

Total number of different parts: 41

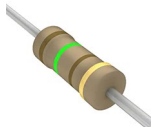

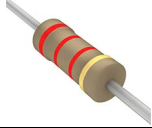

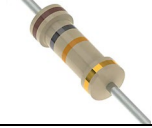

Total number of pieces: 117

**Notes:**

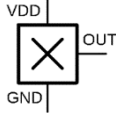

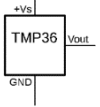

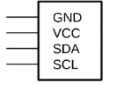

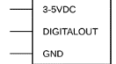

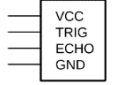

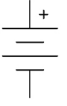

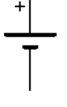

- Parts in this kit can be used with various microcontrollers and single-board computers. Such as an Arduino or Raspberry Pi. (Not Included)
- Many parts are a choking hazard. Keep them away from small children and pets.
- Some parts look identical (except for the color code or part number). Be sure to put each part back in its place.
- The code shown in certain part images should also be printed on the actual part.
- Many parts come on strips of tape. Gently peel off any tape and wipe off adhesive before using each part.
- Bend leads in the middle (not against the body of the component). This helps prevent the leads from breaking.
- The **location** column shows where to place each part when using a STOREHOUSE 10 Tray Utility Box from Harbor Freight.
